Toolbar

View — Opens any selected studies in the viewer.

Modify — Modifies DICOM header information.

Transfer — Transfers selected studies to a PACS.

Export — Used to burn selected studies on a CD or other portable media.

Import — Used for importing non-DICOM data to a study (ex. from scanner, jpg, tiff, etc.).

Drag existing study to the button to prepopulate study data.

Search

Use a combination of criteria to search for Patients or Studies. The more criteria entered, the more narrow the search will be.

Begins the Search process →

Shows Today's studies →
Shows Yesterday's studies →

Clears any search criteria →

Filters by specific modalities

Query Box

Queries any PACS checked in the list. Multiple PACS can be queried at once.

Queries and displays studies residing on the local machine.

Used for importing DICOM images into iQ-VIEW (ex. from CD, USB or folder)

Study Browser

Use the switch to display studies grouped by Patient name.

Column headings in the study browser can be used to sort by the column name.

Select multiple studies by checking the box next to each study.

Use the + to drill into the study and view the series or images contained within.

Modality	Status	Patient name ▲	Patient ID	Date of birth	Study date
OT		**12bit ICPLUT**	Demo263		2/2/2002
NM		**Bone, , ,**	Demo1105517	5/28/1942	6/17/2008
CR		**Breast, Chloe**	Demo003	6/12/1973	1/14/2009
MR		**Cerebellar, Atrophy**	Demo004	6/14/1994	10/25/2002
CR		**Corner, Martin, Nana**	Demo068	6/8/2005	3/30/2006
CT		**Culare, Navi**	Demo008	6/22/2006	12/12/2005
NM		**Demo Esophagus, Christel**	Demo22138	12/15/1934	5/19/2008
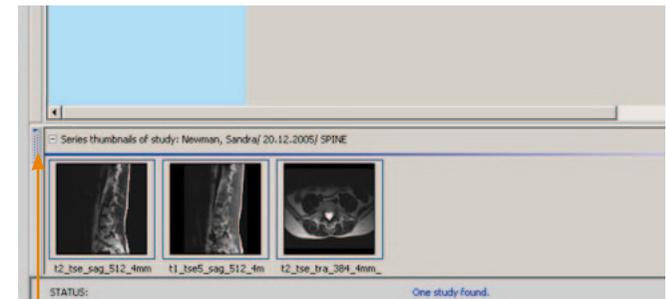

Use the switch to show/hide thumbnails of the selected study.

iQ-VIEW 2.8 QUICK GUIDE - THE VIEWER

Magnifier button queries PACS for previous studies of the current patient

Drag series thumbnails into the panes (views) below for viewing

Double-click an image to view in a single pane (view). Double-click again to return to tiling.

Blue border denotes the active image

Tabs show the various studies loaded

Switch can be used to show/hide the series preview bar

Use to display two studies side by side when multiple studies are loaded.

Side Toolbar

- Synchronizes different series at the current position
- Use to scroll through all series without switching views
- Determines if changes made to an image apply to the series or just the one image
- Scoutlines function

- Turns off side toolbar functions

Click box to select study - turns red when selected
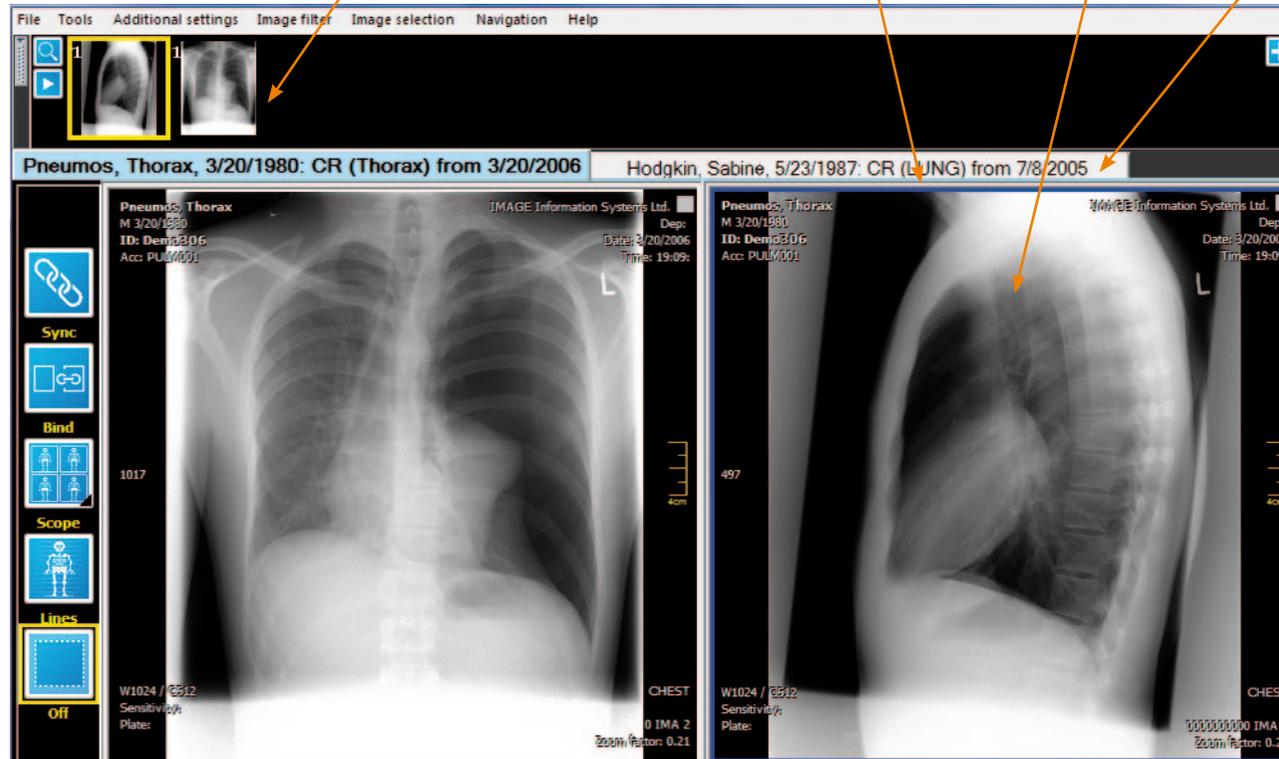

- To save measurements and annotations
- CTRL + SPACE will create a secondary capture and append it to the study
- SHIFT + SPACE creates a new secondary capture series

Bottom Toolbar

Buttons with a black triangle have other tools underneath. Click the triangle to see them.

Resets the image

Closes the viewer
